

Regione Marche Powers Up Security with Quantum Security Gateways and Virtual Systems from Check Point

Regione Marche is the local government body governing the Italian region of Marche.

"Check Point supported our virtual security approach with the unique Virtual Systems solution. It enabled us to deploy industry-leading protection across multiple locations with a single view into everything. It's a game-changer."

- Domenico Cacciari,
Network Administrator, Regione Marche

Challenge

- Consolidate multiple firewall solutions from multiple vendors
- Improve management consistency across environments and locations
- Ensure security continuity for the business and services

Solution

- Check Point Quantum Security Gateways
- Check Point Virtual Systems
- Check Point R80 Security Management

Benefits

- Consolidated multiple point solutions and clusters into a powerful, scalable security infrastructure
- Unified control with a single view across a combined physical and virtual environment
- Reduced troubleshooting time from days to less than an hour
